

Mobile and API Automation Engineer

Job Description:

We are seeking a highly skilled and motivated Mobile and API Automation Engineer to join our dynamic team. The ideal candidate will have a strong background in writing and automating test cases, with expertise in both mobile application and API automation.

Qualification and Skills:

- Bachelor's degree in Computer Science, Engineering, or related field.
- 3-5 years of experience.
- Proven experience in test automation with a focus on mobile and API testing.
- Proficiency in Java, Python, and automation tools like Selenium WebDriver, Cypress, Appium.
- Strong knowledge of API automation tools such as RESTAssured, Pytest, UniRest.
- Familiarity with performance and load testing tools (Locust, Gatling, K6).
- Experience with CI/CD tools, specifically Jenkins.
- Understanding of web services (REST, SOAP) and backend services automation.
- Good understanding of the E2E system landscape and infrastructure components.

If you are passionate about automation testing, possess excellent problem-solving skills, and thrive in a collaborative team environment, we invite you to apply for this exciting opportunity. Join us in shaping the future of our software quality assurance processes!
